

Sand and Gravel Products

Using sand and gravel will look clean and is a natural fit into just about any style of landscape design. Our sand and gravel products are great for building sand, gravel and grass pathways, play areas, and even patios.

Gravel is an important commercial product, with a number of applications. Sand and gravel both promote drainage, and are useful for leveling and creating a sub-layer foundation. Many roadways are surfaced with gravel, especially in rural areas where there is little traffic. Both sand & small gravel are also important for manufacturing concrete. One cubic yard of gravel typically weighs about 3000 pounds.

Washed Sand

- Premium sand
- Washed, extremely clean
- Ideal for topdressing lawns
- Ideal for brick/masonry work
- Course angular sand (similar to brown sugar)
